

Sound and Light Reducing Curtains:

Utilising our extensive soft furnishing and aircraft curtain manufacturing capability, Airline Services Interiors has developed and manufactured new light and sound reducing curtains to meet EASA's CS FTL.1.205 Directive which states that cabin crew must have a suitable place to rest (Class 2 crew rest) and some separation from passengers by at least a curtain to provide darkness and some alleviation of sound.

Product:

- Curtains are individually designed to meet customers' requirements
- All styles and sizes of curtains can be manufactured
- Curtains are tested in a purpose-built rig at our facility
- Design and manufacture of the curtain track and structural attachments
- Provision of modification paperwork
- Embroidered and Emergency exit tabs etc.

Benefits:

- Satisfies EASA CS FTL.1.205 Directive
- Produced with very short lead times
- Cost effective
- Dedicated development/design support
- Manufacture for OEM
